

The “Do More Engineering” Process

INTEGRATING DFMA INTO THE PRODUCT
DEVELOPMENT PROCESS

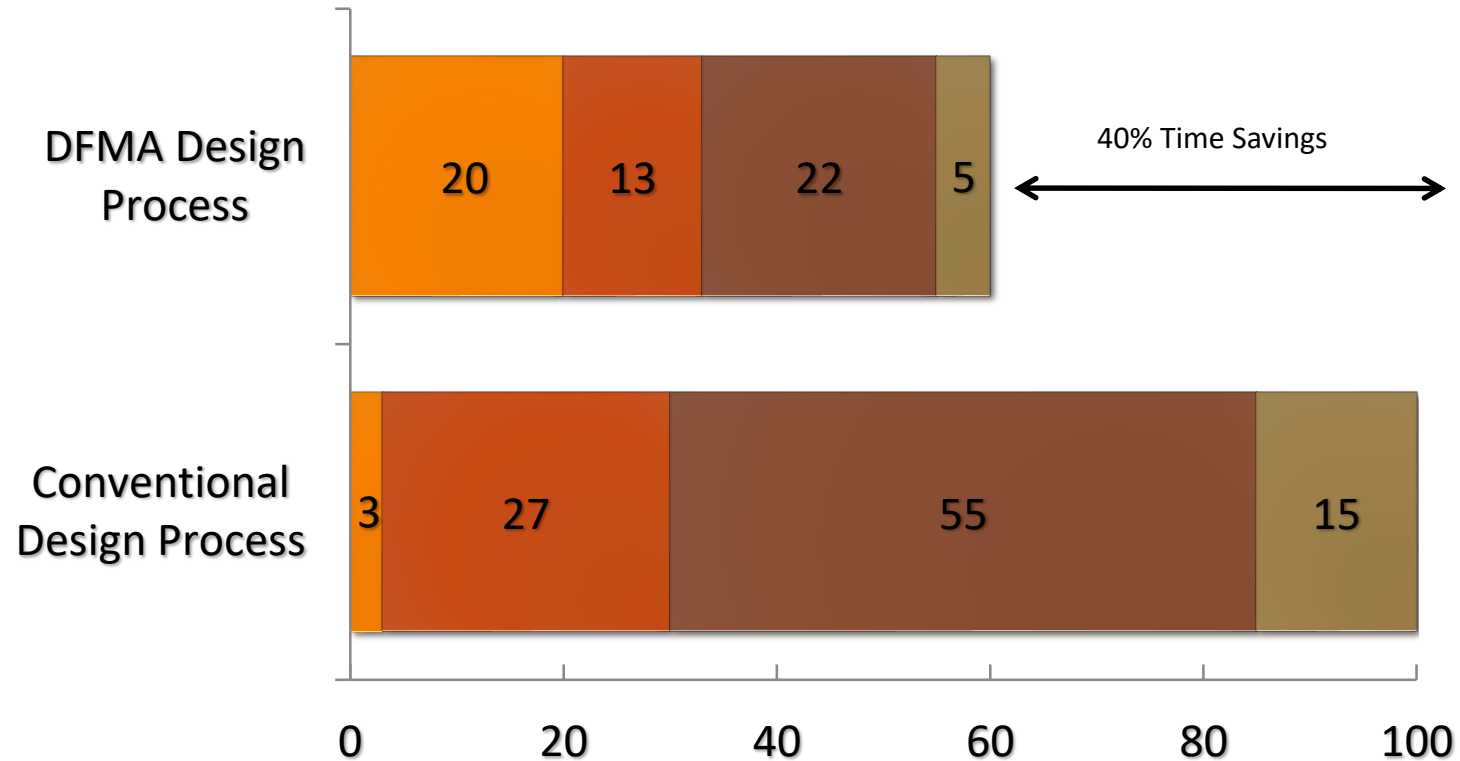

Typical Product Development Process

Activity

Distribute 100% product development cycle time across the four phases

The More Things Change ...

Percentage of Design Time

- Concept design
- Initial design
- Design changes
- Data dissemination

“Do More Engineering” Product Development Process

“Do More Engineering” Product Development Process

“Do More Engineering” Best Practices

Great Process \neq Great Outcome

- Lacked diligence in Portfolio Management
- Too many projects/person
- “Sunk money” syndrome ... lacked diligence in canceling projects
- “Ugly baby” syndrome ... prima donna engineers not open to others’ ideas (especially from manufacturing)
- Poor accountability

Ingredients for DFMA[®] Deployment Success

- Structured product development process ... phased objectives, deliverables, & tools (Best Practices)
- Stakeholders set clear expectations/goals and support “good decisions”
- Consistent, data-driven decision making processes
- Clear roles & responsibilities (i.e. RASI)
- Effective competency development
- Designated subject matter experts (SME's) to serve as mentors & consultants

Ingredients for DFMA[®] Deployment Success

- Project portfolio management ... project identification, prioritization, funding, and staffing
- Project staffing for success ... 2-3 projects/person
- Project metrics & tracking: status, no. parts, costs, NRE, capital ... predicted vs. actual vs. target
- Lessons learned collected & shared
- Integration with other business processes and practices (i.e. VAVE, FMEA, MRP/ERP, etc.)

Facts ... Discipline ... Constancy of Purpose

FIRST PRINCIPLES REASONING

"YOU BOIL THINGS DOWN TO THEIR FUNDAMENTAL TRUTHS AND REASON UP FROM THERE."

VS.

"REASONING BY ANALOGY WHICH ESSENTIALLY MEANS COPYING WHAT OTHER PEOPLE DO WITH SLIGHT MODIFICATIONS."

"Without discipline, there is no Marine Corp."

"In God we trust, all others bring data."

"Create constancy of purpose toward improvement ..."

Thank You!!!
